

# Supporting Pupils with Medical Conditions Policy

**September 2023**

To be reviewed 2025 or as required

We are committed to ensuring that all children with medical conditions, in terms of both physical and mental health, are properly supported at our schools so that they can play a full and active role in school life, remain healthy and achieve their academic potential.

No child with a medical condition will be denied admission or prevented from taking up a place in our school because arrangements for their medical condition have not been made.

We will ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases therefore we will not accept a child in school at times where it would be detrimental to the health of that child or others to do so.

This policy will be reviewed regularly and it is readily accessible to parents and school staff.

When our school is notified that a pupil has a medical condition we will:

- make arrangements for any staff training or support
- make every effort to ensure that arrangements are put in place within the shortest possible time frame.
- not wait for a formal diagnosis before providing support to pupils

## Individual healthcare plans

Any parent reporting that their child has an ongoing medical condition such as asthma, epilepsy, diabetes or more complex medical condition will be asked to complete an Individual Healthcare Plan (IHP). It is a legal requirement that this is updated annually.

We will ensure that plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed. We will assess and manage risks to the child's education, health and social wellbeing, and minimises disruption.

Our IHP requires information about:

- the **medical condition, its triggers, signs, symptoms and treatments**;
- the **pupil's resulting needs**, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons;
- specific **support for the pupil's educational, social and emotional needs** – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- the **level of support** needed (NB If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring)
- **who will provide this support**, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
- **who** in the school **needs to be aware** of the child's condition and the support required;
- arrangements for **written permission from parents** and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours;

- arrangements or procedures required for **school trips** or other school activities outside of the normal school timetable that will ensure the child can participate, e.g. risk assessments;
- **what to do in an emergency**, including whom to contact, and contingency arrangements. Some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan.

## Staff training and support

Staff are supported in carrying out their role to support pupils with medical conditions through appropriate training and any member of school staff providing support to a pupil with medical needs will have received suitable training.

No member of staff will give prescription medicines or undertake healthcare procedures without appropriate training or instruction (updated to reflect requirements within individual healthcare plans).

## The child's role in managing their own medical needs

Where children are deemed competent to manage their own health needs and medicines by their parents and medical professional they will be supported to do this. We see this as an important step towards preparing pupils for the next stage of their education.

## Managing medicines on school premises

(see also the Administration of Medicines Policy)

At our schools:

- medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so
- no child will be given prescription or non-prescription medicines without their parent's written consent
- we will never give medicine containing aspirin unless prescribed by a doctor.
- Medication, e.g. for pain relief will never be administered without first checking maximum dosages and when the previous dose was taken.
- Parents will be informed
- where clinically possible, we will expect that medicines will be prescribed in dose frequencies which enable them to be taken outside school hours
- we will only accept prescribed medicines if they are:
  - **are in-date**
  - **are labelled**
  - **are provided in the original container as dispensed by a pharmacist**
  - **include instructions for administration, dosage and storage.** *(NB The exception to this is insulin, which must still be in date, but will generally be available to schools inside an insulin pen or a pump, rather than in its original container)*
- all medicines will be stored safely
- Children will know where their medicines are at all times and will be able to access them immediately. Where relevant, they will know who holds the key to the storage facility. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will be always readily available to children and not

locked away, including when pupils are outside the school premises, e.g. on school trips

- when no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will always be used for the disposal of needles and other sharps
- school staff will administer a controlled drug to the child for whom it has been prescribed. Staff administering medicines will do so in accordance with the prescriber's instructions.
- We will keep a record of all medicines administered to individual children, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at school will be noted in school

## **Record keeping**

We will ensure that written records are kept of all medicines administered to children. We recognise that records offer protection to staff and children and provide evidence that agreed procedures have been followed. Parents will be informed if their child has been unwell at school.

## **Emergency procedures**

In an emergency situation the emergency services will be contacted immediately and parents will also be contacted using the contact details held on the schools information management system. In cases where there are serious concerns over a child's well being

## **Day trips, residential visits and sporting activities**

We always actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

## **Complaints (see complaints policy)**

If you have a complaint about how your child's medical condition is being supported in school please contact the Headteacher or Deputy Headteacher overseeing Inclusion provision in the first instance.
